Internet access to all journals

We are delighted to announce that in 1996 **all journals** will be available electronically through the Internet via the World Wide Web.

We firmly believe that the technology we have utilised, together with the acknowledged quality of all our titles, has enabled us to make available the most advanced electronic journal product yet released.
Why not judge for yourself by downloading a **FREE Sample Article** from our WWW site (address below).

This new service enables you to:

- search tables of contents and abstracts of all issues in the volume – completely free of charge!
- access text using a World Wide Web interface and view via pioneering Adobe Acrobat technology
- see on screen exactly what you see on the printed page – half-tones, graphs and tables are faithfully reproduced
- select, search and print locally any given article and **up to 4 weeks before receiving the print version**
- please note: in 1996 institutional subscribers may make electronic access available to all registered users within the confines of their institution.

Your librarian (or the registered subscriber to this journal) has been sent full information about this new service. Access is ONLY being offered in conjunction with a subscription to the print version of this title. Full details are also available at the WWW site.
